

The IET Big Data Book Series - The topic of Big Data has emerged as a revolutionary theme that cuts across many technologies and application domains. This new Series brings together topics within the myriad research activities in many areas that analyze/compute/store/manage/transport massive amounts of data, such as algorithm design, data mining and search, processor architectures, databases, infrastructure development, service and data discovery, networking and mobile computing, cloud computing, high-performance computing, privacy and security, storage, and visualization. to name a few.

Editorial Board

Prof. Samee Khan, North Dakota State University, USA

Prof. Jiannong Cao, Hong Kong Polytechnic University, HK

Dr. Yousif Mazin, Royal Dutch Shell Account at T-Systems International

Dr. Rajiv Ranjan, Newcastle University, UK

Prof. Sartaj Sahni, Florida University, USA

Prof. Lizhe Wang, Chinese Academy of Science, China

Prof. Paul Watson, Newcastle University, UK

Topics covered in this Series include:

- Autonomic computing
- Data centre computing
- Cloud computing
- Green Computing
- Peer to Peer computing
- Multi-core and many core computing
- Parallel, distributed and high performance computing
- Programing model and languages
- Workflow computing
- Unconventional computing paradigms
- Mobile computing and sensor networking
- Service computing, Internet computing, Web based computing
- Networking infrastructures
- Scalable databases
- Cyberinfrastructures and e-Science
- Smart Cities
- Analytics and data mining
- Big Data Applications.

Samee U. Khan is an associate professor of electrical and computer engineering at the North Dakota State University, USA. He is the Director of the Cloud Computing Center, the Cyber-Physical Systems Laboratory, and the Distributed Computing, Communications, and Systems Laboratory. He is an ACM Distinguished Speaker, an IEEE Distinguished Lecturer, a Fellow of the IET, and a Fellow of the BCS. Samee's research interests include optimization, robustness, and security of: cloud, grid, cluster and big data computing, social networks, wired and wireless networks, power systems, smart grids, and optical networks. He is an associate editor of the IEEE Access, IEEE Cloud Computing, IEEE Communications Surveys and Tutorials, and IEEE IT Pro. He is also Chair of the Steering Committee of the IEEE Technical Area in Green Computing, Vice Communication Chair of the IEEE Special Technical Community on Sustainable Computing, a member of the Executive Committee of the IEEE Technical Committee on Scalable Computing, and a member of the IEEE Technical Committee on Cyber-Physical Cloud Systems.

Submit a project idea or a book proposal for the Series

Proposals for coherently integrated International multi-author edited books and handbooks, research monographs, reference books, and advanced level textbooks will be considered for the Series. Each proposal will be reviewed by the Series Editor and/or the Series editorial board members with additional reviews from independent reviewers where appropriate

Please email your book proposal for the IET *Big Data* Book Series to:

Prof. Samee Khan, North Dakota State University, Email: samee.khan@ndsu.edu
